## **A Call for Change**

Disability Rights Wisconsin, Wisconsin Family Ties, and WI FACETS issued a call for change with the 2009 publication of *Out of Darkness...Into the Light*. This report shone a light on the physical and psychological harm caused by the inappropriate use of seclusion and restraint in schools. Not only did this report raise public awareness about this pressing issue, but it also provided the impetus for passage of 2011 Wisconsin Act 125 on March 19, 2012. The call for a state law governing the use of seclusion and restraint in schools found in *Out of Darkness...Into the Light* was heard loud and clear. No longer would parents, school personnel, and the public be in the dark about the parameters of the use of seclusion and restraint in schools, the rights of students, and the procedures that schools must follow.

## **The Process of Change**

Although all three organizations had identified the need for a law governing the use of seclusion and restraint in schools long before the 2009 publication of *Out of Darkness...Into the Light*, this report had a significant impact on the public and legislators alike. In terms of the general public, the report spurred media across the state to report on the need for change. Students who had suffered emotional and physical injuries due to incidents of seclusion and/or restraint had an outlet to share their stories. Stakeholders (including parents, school personnel and the Wisconsin Department of Public Instruction) and legislators collaborated in drafting the bill that ultimately became Act 125. Act 125 was the result of bipartisan sponsorship. Clearly, the research cited, the heart-rending stories told, and the recommendations proffered in *Out of Darkness...Into the Light* spurred legislators to act.

Significant requirements of Act 125 include: parental notification after an instance of seclusion and/or restraint; preparation of a written report containing the details of the seclusion and/or restraint; and preparation of an annual report to the school board detailing the instances of seclusion and/or restraint at each school.

## **Reporting Requirements in ACT 125**

ACT 125 requires specific reporting of each individual incident and then annual reporting each year by September 1. Individual reporting is as follows:

### Parental notification:

- As soon as practicable, but no later than 1 business day after the incident.
- Notification of the incident.
- Notification of the availability of the written incident report.

### Written incident report:

- Prepared by principal or his or her designee within 2 business days after the incident and after consulting with the individuals present during the incident.
- Must be made available to the parent for review within 3 business days after the incident.
- Must be retained as a record by the school.
- Report must include the pupil's name, date, time, and duration of the use of seclusion or restraint.
- Report must also include a description of the incident, including description of the pupil's actions before, during, and after the incident.
- Names and titles of the individuals present during the incident.

### Annual report to the school board:

By September 1<sup>st</sup>, the principal of each school or his or her designee shall submit to the governing body a report containing:

- Number of incidents of seclusion during the previous school year.
- Number of incidents of restraint during the previous school year.
- Total number of students who were involved in the incidents.
- Number of students with disabilities who were involved in the incidents.

## Reporting Issues and Findings

On October 25<sup>th</sup>, 2013, Disability Rights Wisconsin sent an open records request to each special education director in the state of Wisconsin, asking for the seclusion and restraint data that they were to have presented to their school boards by September 1<sup>st</sup> per the requirements of Act 125. The results provide a baseline of information about current Wisconsin instances of seclusion and restraint of students and, more specifically, students with disabilities. Communications with school districts highlighted some confusion and questions regarding data collection and the Act 125 reporting requirements.

### Individual Reporting of Seclusion and Restraint

During the data collection, school districts reported to Disability Rights Wisconsin some of the following issues with the individual collection of seclusion and restraint reports during the school year.

- Some school districts did not collect information on seclusion and restraint incidents.
- Some school districts collected information on behavioral incidents that would not be considered seclusion or restraint.
- Some school districts did not collect information on whether or not children who were secluded and/or restrained had a disability.
- Some school district personnel were not clear about who was in charge of data collection at individual buildings.

### Annual Reporting of Seclusion and Restraint

The following issues were discovered when school districts began responding to the open records request.

- Some School districts were not aware of the year-end reporting requirement.
- Most school districts did not report data by building, but by overall district totals.
- Some school districts reported a combined total of seclusion and restraints.
- Some school districts did not report due to concerns about confidentiality.

- Some school districts over reported seclusion based on incorrect definitions (e.g., timeouts, breaks, office referrals).
- Some school districts did not report the number of students involved in the incidents and/or the number of students with a disability.
- Especially among larger school districts, it appears possible that districts may have underreported instances of seclusion and/or restraint.

### Key Findings

- School districts that did not respond to the open records requests: 22.
- School districts that did not report due to confidentiality: 21.
- School districts reporting zero seclusions and restraints: 130.
- School districts reporting seclusion and restraint separately: 278.
- Total number of seclusions AND restraints in Wisconsin for the 2012-2013 school year (for those school districts that reported data): 21,454.
- Total number of students involved in incidents: 2,976.
- Total number of students with a disability involved in incidents: 2,214 (approximately 74% of total students).

### Next Steps

Disability Rights Wisconsin, WI FACETS, and Wisconsin Family Ties continue to work directly with families, school districts, and the Wisconsin Department of Public Instruction on the use of seclusion and restraint in schools. Our agencies will continue to gather information yearly to compare the data in an effort to identify trends and to help stakeholders work together to find ways to reduce the use of seclusion and restraint in schools.

If you feel your child has been inappropriately restrained or secluded or you believe your child had been restrained or secluded and the report does not reflect the use of seclusion and restraint, please contact one of our agencies for assistance.
