

Script: My name is [your full name]. I live in [your town, street address]. Medicaid is very important to me. I want the Senator to promise to vote against any bill that changes Medicaid into a per capita cap or block grant because:

- Per capita caps will mean huge cuts to Medicaid in Wisconsin.
- Cuts will limit Wisconsin's flexibility to respond to the needs of Wisconsinites, would cause many of people across Wisconsin to lose health care, and eliminate necessary services that children and adults with disabilities rely on to live in the community.
- Huge cuts to Medicaid threaten the right to live in the community; this right means nothing if people cannot get the services they need.
- Capping Medicaid will have a serious impact on the lives of children and adults with disabilities like [me/ my family member/ my friends].

This process is moving too quickly and without public input. We need to slow down and gather more information to improve our health care system. We're counting on you to do the right thing. Please stand up for children and adults with disabilities and save Medicaid! No cuts or caps!
